

SUPERIOR  
TIME TO THINK BIG

**LASER TV 4K**

**Laser TV 120L5HA incl. Cinema Screen**

### Rich images in 4K Ultra HD

Four times as sharp as Full HD: Ultra-fine details in 4K Ultra HD enable a sharp and clear image display with 8.3 million pixels. In addition, 4K upscaling ensures that content with lower resolution is upscaled for better picture quality.

### X Fusion Laser technology

The Laser TV features an X-Fusion laser light source equipped with a lifespan of 25,000+ hours.

### Easy to use thanks VIDAA

Via the customizable user interface VIDAA it is easy to freely arrange favorite apps and quickly open them. More flexibility, more individuality. The endless search and scrolling belongs to the past.

### Complete Triple tuner

The Laser TV has a built-in Triple tuner including DVB-T2-HD for the uncomplicated TV enjoyment. In addition, there are many connection options such as CI+, HDMI 2.1, USB or Bluetooth.

### Easy on the eyes & lower blue light

The image you see on the laser TV will be reflected rather than projected directly into the eyes and achieve almost 0 blue light exposure.

That means less strain on the eyes when watching TV for a long time.

### Immersive cinema screen

For your own home cinema in darker environment, the L5H offers an included CLR (Ceiling Light Rejection) Cinema Screen in 120 inches. This is an exceptional image display with a large viewing angle.

# Technical Features

Model	120L5HA
Color	silver /light grey
